

## MOBLE MOTOR PUMP CONNROLLER

## MODEL GSM-SPAT

Our GSM MotorPump Controllers are most unique and specially designed for farmers, agriculturists and industries to operate and monitor remotely located submersible pumps and motors. They can switch ON and switch OFF the motor pumps from their homes or anywhere by using a SMS/ CALL/Android Application. It also saves water, time and electricity. Our GSM based mobile pump controller are manufactured with advanced embedded microcontroller technology and quality process.
