

11 Channel IR – Wireless Remote Control Switch for any AC appliances upto 1000 watts

RMG introduces 11 channel IR based REMOTE CONTROLLER for electrical appliances such as lights, bulbs, television, music system and fan, which is a real boon to this automated world.

Description:

This product constitutes two categories – a. Electromagnetic relay based b. Triac based.

- Electromagnetic (EM) relay based (9 channel output) – Can be connected to any electrical appliances upto 1000 watts except dimmers and fan regulators.
- Triac output (2 channel output) – Can be connected to dimmers and fan regulators.

Electrical appliances that can be connected to 9 channel output:

- ❖ Lights and bulbs – LED lights and LED bulbs, Incandescent bulbs, CFL bulbs, Halogen bulbs, HPS (High Pressure Sodium) and LPS (Low Pressure Sodium) bulbs, LED street lamps and any lighting source below 1000 watts
- ❖ Fan – Only for ON and OFF (For regulation, connect it to 2 channel output)
- ❖ Television
- ❖ Music system
- ❖ Domestic water pump motors upto 1HP

Electrical appliances that can be connected to 2 channel output:

- ❖ Dimmers, night lamps
- ❖ Fan for regulation

Salient Features:

- ❖ Input Power : AC 90V to 250V
- ❖ Relay output (Load) : AC 250V / 7A
- ❖ 10 speed regulator for fan
- ❖ Saves electricity
- ❖ Easy to operate
- ❖ Easy to install
- ❖ Sparkless switching
- ❖ Shock proof
- ❖ 1 year warranty

Do's and Don'ts:

- ❖ Give maximum load capacity of not more than 1000 watts for each points – In 9 channel.
- ❖ The input line to controller and the output that is connected to the appliances must be in same phase lines.
- ❖ Don't connect AC (Air conditioner), exhaust fans, refrigerator, washing machine and induction stove, kettles etc. that consumes above 1000 watts.

Package contains:

Controller – 1 nos, 1 remote without battery, user guide and warranty card.
